

Sage an emotionally intelligent voice AI Care Manager

Faster time to productivity. Faster time to realized benefits.

Sage is a purpose-built voice AI care manager seamlessly integrated with Health Cloud, designed for quick installation and easy configuration with standard or custom assessments. With built-in memory, Sage autonomously calls patients, manages follow-ups, and ensures assessments are completed end-to-end.

Integration with Health Cloud

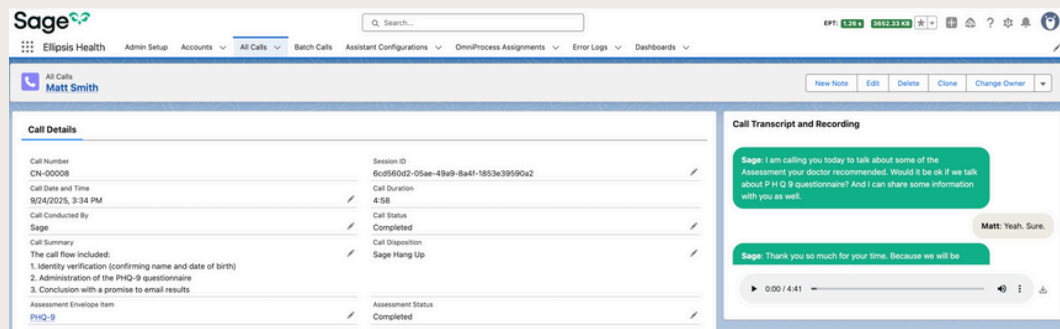

- ~1 hour installation and configuration
- Ability to work with any in-built assessments or custom questionnaires
- No additional configuration required
- No additional consulting or technical expertise needed to implement

Available Epic Integration

- Customized integration with Epic
- Enables continuous data flow
- Enhances patient care coordination
- API-first architecture for flexible integration
- Standard FHIR protocol supported

Example Assessments

- Care planning / Transition of care
- Program enrollment
- General Anxiety Disorder (GAD-7)
- Patient Health Quality (PHQ-9)
